

First Nation Water Billing Software

Billing

Simple billing entry. Enter the number of units of water delivered and the system will calculate the amount due. You can also add delivery and/or late payments charges.

There are 4 different water rate scales that can be configured based on customer type: Residential, Business, Government and Other.

Receipts

When a customer makes a payment you can enter the amount paid and produce a receipt for them. The software keeps track of all payments made and the amount still outstanding for each customer.

Invoices

You can produce an invoice as soon as you enter a bill for a customer, which would be done as soon as the water has been delivered. This is also where you would add any late payment charges as necessary.

Reports

- Detailed Invoices itemizing units delivered, delivery charge, late payment charges, etc.
- Payment Receipts
- Unlimited Billing and Receipt History Report
- Individual Customer History Reports—all billings and payments listed by month
- Payment Listing Report—by Customer Type for a range of dates
- Revenue Listing Report—detailed report on units delivered, cost per unit, unit cost, service and late charges, etc. by Customer Type for a range of dates
- Customer Balances Report—shows the amount owing as of given date—listed by Customer Type
- 12 Month Summary—detailed report on units delivered, unit costs, service charges, late fees, amounts paid and balance forward/owing, etc. for a 12 month period.
- Consumption Summary—report showing units sold, revenue generated, amount paid on accounts, receivables outstanding for all 4 customer types (Residential, Business, Government, Other)
